VISION	MISSION	VALUES
To be the “Most Preferred Brand Service Provider” for our clients in the chosen areas of business	To deliver value to our <u>clients and partners</u> through high <u>quality-focus</u> , best-in-class <u>performance</u> culture and <u>innovative</u> practices	<ul style="list-style-type: none">➤ Quality➤ Performance➤ Innovation➤ Partnership

The following are the major services we offer worldwide:

- **Managed services including BPO / KPO**
- **Training and Consulting**
- **Software Development**
- **Engineering Management Services**

We offer world – class training workshops on Project Management, Operational Excellence, Software and Managed Services.

Project Management

Certified Associate in Project Management (CAPM®) from Project Management Institute is a valuable entry-level certification for project practitioners. Designed for those with little or no project experience, the CAPM® demonstrates your understanding of the fundamental knowledge, terminology and processes of effective project management. Whether you're a student, new to project management, changing careers, or already serving as a subject matter expert on project teams, the CAPM can get your career on the right path or take it to the next level.

Project Management Professional (PMP®) Certification is the most sought after credential for any project professional. Our training program is purely based on PMI's Project Management Body of Knowledge and each knowledge area are covered by Topic Introduction, Case Study or Example, Introduction to the standard industry template(s) and Project work based on live scenarios.

Operational Excellence

Lean Six Sigma is a hybrid methodology combining Lean and Six Sigma to enable a customer focused and data driven approach towards process improvement by reducing waste. The improvement methodology enables to reduce product or service failure rates to a negligible level (roughly 3.4 failures per million opportunities). Six Sigma encompasses all aspects of a business, including management, service delivery, design, production and customer satisfaction. Lean Six Sigma companies typically spend less than 5 percent of their revenues addressing and repairing quality problems.

Lean Six Sigma Green Belts (LSSGB) lead process improvement projects full time or part time and assists the organisation in achieving operational excellence. A Lean **Six Sigma Black Belt (LSSBB)** leads break through improvement projects aiming for at least 10X improvement. He or she also plays a critical role in mentoring GB projects and ensure business transformation. A **Lean Six Sigma Master Black Belt (LSSMBB)** plays a critical role in guiding the enterprise-wide deployment of strategic initiatives in product / process design and process improvement. Six Sigma MBBs interface with top management to align the internal improvement initiatives to the strategic directions of the organization.

Business Analytics is a specialized course designed to deliver knowledge on application of statistical concepts in real world scenarios. This course is designed to equip professionals working in Finance, Marketing, Economics, Statistical, Mathematics, Computer Science, IT, Analytics, Marketing Research, or Commodity markets with the essential tools, techniques and skills to answer important business questions. The **Harvard Business Review** named it as one of the 'sexiest jobs of the 21st century.

MATLAB is a fourth generation programming language and used for data analysis, use algorithms and develop various models. A powerful tool for numerical computing with ability to customise for various business applications. It also supports various applications with graphical user interfaces with advanced graph plotting features.

Software

Asp.Net is used to create Web pages and Web services and is an integral part of Microsoft's .NET vision and is web framework for building web sites, apps and services with HTML, CSS and JavaScript. ASP.NET connects information, people, systems, and devices through software integrated across the Microsoft platform, .NET technology provides the ability to quickly build, deploy, manage, and use connected security-enhanced solutions with Web services. ASP.NET-connected solutions enable businesses to integrate their systems more rapidly and in a more agile manner and help they realize the promise of information anytime, anywhere, on any device.

Web design involves client requirement analysis, static and dynamic requirement usability, concept creation, layout designing, and conversation of Photoshop design to html/css, functionality implementation and browser testing. Our Web Design Courses are the perfect way to learn and develop the skills which will assist in designing and building quality websites; an ability which is in popular demand in today's workplace.

Our course on **Materials Management** on ERP provides a steady stream of competent young men & women with the necessary knowledge, skills and foundations for acquiring a wide range of rewarding careers into the rapidly expanding world of Materials Management focusing on core subject of Management of Technical Specification and Standardization. The course is conducted by highly professionals experienced in MNC industries.

We offer **Oracle, Data Warehouse, Java, Sharepoint, Software Testing, Informatica, Cognos, Oracle DBA, Hadoop, SAS, R Language, UNIX SHELL Scripting, C and C++** and more to the students and corporate executives..

Managed Services

As a company providing BPO services to a range of different clients, we understand that regular and comprehensive development of our employees' skills is an integral aspect of our quality commitment. Our BPO training, which includes **voice and non-voice** training, is the very best in the industry and through our tried and tested programs; we ensure that our people are able to deliver unparalleled performance levels to our client.

Soft skills is a term often associated with a person's "EQ" (Emotional Intelligence Quotient), the cluster of personality traits, social graces, communication, language, personal habits, friendliness, and optimism that characterize relationships with other people. Soft skills complement hard skills which are the occupational requirements of a job and many other activities and are increasingly sought out by employers in addition to standard qualifications.
